

Continental Electronics
Super Power Transmitters

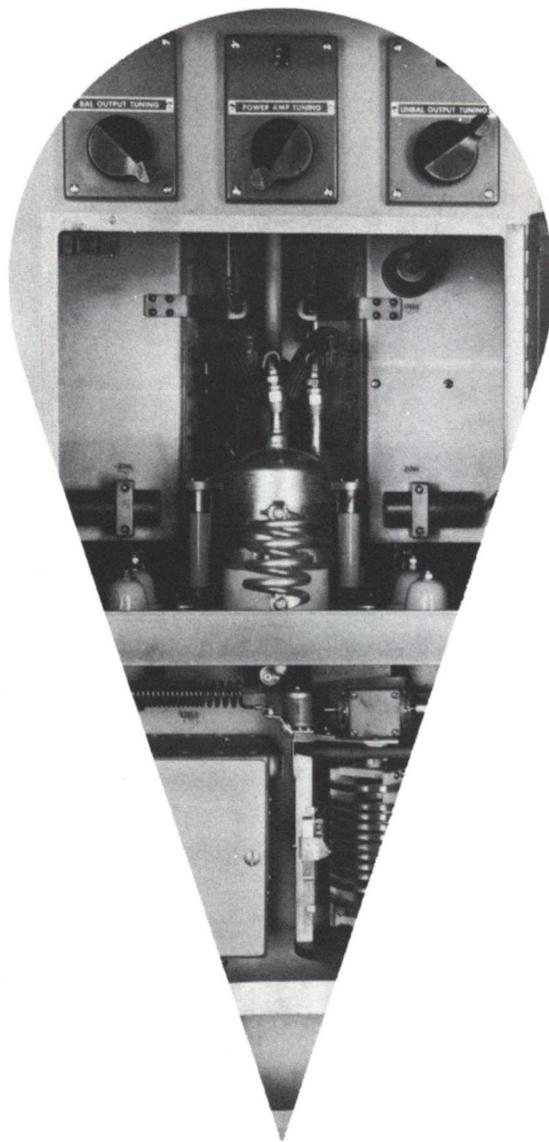

Since our beginning, we have concentrated and specialized in the design and building of super-power transmitting equipment.

Our experience, skill, engineering and development techniques are dedicated to the business of designing, manufacturing, testing and installing the very finest, most powerful radio transmitters in the entire world.

Continental Electronics is currently engaged in the construction of superpower transmitters for single sideband communication, scatter transmission equipment, commercial broadcast transmitters and super power radar transmitters.

At Continental Electronics the emphasis is on engineering. Engineers form the very core of our entire operation . . . the company having been formed and built by engineers. Today, engineers hold the top administrative posts.
